

5-7-93

Dear Mr. Weisberg.

Just a quick note
and a copy of Page 19
from my manuscript

"Spam Peg for a Round Hole"

I Really want to
Thank you for all your
help. Some of which
I'm sure you are not
aware of.

I think he
is a police
sergeant. J. W. Hughes

Before I go too much further, I would like to pause here and take a moment of your time and this space to acknowledge a very Special American Citizen:

Those of us that call ourselves Investigators of the Kennedy Assassination have been helped greatly by the writings and pursuits of one very dedicated American who for years has gone unnoticed and un-thanked. He is not only an Investigator, but a Pioneer. He was the first Author/Investigator to challenge the United States Government under the "Freedom of Information Act" and was refused information. But again, he would not stay quiet and eventually won "our" battle for release of certain information. For the rest of us, what he did made our research a lot easier. He was the Pioneer.

Mr. Harold Weisberg.

As I said, Mr. Weisberg wrote seven books on the Kennedy Assassination, but all were so controversial that most publishers were afraid to touch his work. Why, because Mr. Weisberg said it like it was. This type of revelation was so hot and so controversial that the publishers of this country turned their backs on him.

Some authors have been very critical of Harold Weisberg and have called him names that in most cases don't fit. Mr. Weisberg is very opinionated and very adamant in his beliefs about the Assassination. If it had not been for this very special person, most of us would not have access to the closed doors that we do have access to.

Harold finally published his own writings and are available through correspondence with him: 7627 Old Receiver Rd, Frederick, MD 21702.

The Government of the United States has LIED and has hidden the facts of the Kennedy Assassination from the American People. They have deceived us since the moment the call was made setting up the assassination. Our Government has mastered the deception technique. But, men like Harold Weisberg have braved the threats and intimidations and have stood fast for what they believe and know is right,

Mr. Weisberg.....Sir, I commend you !
